

NORMAN LOCKYER OBSERVERS GROUP SIDMOUTH DEVON

JUPITER OBSERVATION & SKETCHING AUGUST 27TH 2010

TIME.....

OBSERVERS NAME.....

TELESCOPE USED.....

Please record what you see , try not to let your imagination fill in what you can't see.
Use the correct orientation of the planet e.g if it is observed at an angle then draw it at that angle
this will help with a true observation based on the telescope used.

Also if you see any of the moons please draw them in, name them if you can.
